

To Whom it May Concern:

I as an American Citizen am voicing my opinion on the Do Not Call List for the state of New Jersey. We the people of New Jersey have stated that we do not want telephone calls from unwanted people selling things we do not want. Why is that so hard for the Federal government to understand. We the people, who have voted you into office, who you are representing what we want not what big business wants can't understand we want a DO NOT CALL LIST for our protection. As an American Citizen I am asking you to leave the Do Not Call List alone in the States. We the people have said what we want. A Do Not Call List that lets us have freedom from being harassed. Life has enough things to deal with without dealing with some calling to push this junk on you at dinner or just before bed time.
